Booster Sessions Module

Directions:

- Review the “Sample Booster Session Protocol” article
- Review the “Instructional Strategies to Use per Lesson Planning Phases” guide

Activity 1: As a team, use the sample booster session protocol article to create a Booster Session Protocol for your school.

Activity 2: Using the “Instructional Strategies to Use per Lesson Planning Phases” guide put together a booster session lesson plan. First, decide which behavior from your data needs special attention. Then use the guide to select one warm-up activity to begin the lesson. The second activity for the session should come from one of the introduction activities. Next, select a practice activity. End the session with a closure activity.

Reminders:

*Each month, a grade level from your school should be responsible for leading the booster session(s). A teacher from that grade level will attend the ESD meeting one month prior to the special event and booster session(s) to share the lesson plan developed from the Instructional Strategies to Use per Lesson Planning Phases to the ESD team.
