

WILLIAM & MARY

CENTER FOR GIFTED EDUCATION

Center for Gifted Education Curriculum Materials *Designed for High-Ability Learners, Their Teachers, and Parents*

The Center for Gifted Education has been in operation in the School of Education at The College of William and Mary since 1987. From the time of the Center's inception, one of its major emphases has been the development of exemplary curriculum frameworks and units of study for classroom use with high-ability learners. The Integrated Curriculum Model (VanTassel-Baska, 1986, 1995, 2002) is designed to respond to gifted learners' characteristics of precocity, intensity, and complexity through its three dimensions of advanced content, higher level processes and product development, and interdisciplinary concepts, issues, and themes. Curriculum development in science, language arts, math, and social studies has involved teams of content specialists and educators in writing and field-testing units. Many Center materials have been recognized for their quality by the United States Department of Education and the National Association for Gifted Children. Teachers and students in all 50 states and 28 international communities use Center materials.

Navigators

The *Navigators* are novel study guides developed as a resource for teachers and students. These guides encourage advanced readers to develop their skills through structured questions and activities that highlight themes and concepts, literary elements, and real-world connections contained within the books. Students are also able to develop their own vocabulary and writing skills by exploring and emulating the language and style used by different authors. In each *Navigator*, several research activities are included. Please visit www.cfge.wm.edu to access *Navigators* that are available free of charge and view the most updated list of *Navigators* in addition to those listed on the order form.

Teaching Model Cards

Teaching Models Cards \$5.00 each, set of 11 for \$35.00
