Open to high school and college students, this one-of-a-kind program in legal education provides an introduction to selected legal issues that we may face as Artificial Intelligence and other groundbreaking technologies advance. Participants will:

- Understand the concepts of Artificial Intelligence (AI), machine learning, and deep learning, data analytics, and the Internet of Things by reference to real-life examples.
- Identify and discuss selected legal risks associated with the combination of AI, data analytics, the Internet-of-Things and related technologies, including cybersecurity, privacy law, civil and criminal liability, and issues under the law of war.

**Location:** William & Mary Law School, 613 S. Henry St., Williamsburg, VA
