Think Like a Mathematician  
3rd  
Math is everywhere and it is exciting to introduce students to real-world applications of the concepts they study in school each day. In Think Like a Mathematician, students will explore interdisciplinary content, foster creativity, and develop higher-order thinking. Students will engage in exploration activities, complete mathematical challenges, and then apply what they have learned by making real-world connections.

Mission to Mars  
3rd-5th  
Ever wanted to an exciting journey? What if you could take that journey from the comfort of the classroom? Welcome to Mission to Mars!

Over the course of these lessons, students will learn about and plan a mission to Mars. Students will apply their creativity and science and math knowledge to explore the Red Planet. Not a scientist or engineer? That’s okay! You’re going to learn everything you need to know while preparing for and conducting these lessons. And you actually already have some engineering skills, whether you know it or not. Ready, set, let’s go!

Lego Robotics I  
6th-7th  
This is a beginning course in robotics. We will be utilizing Lego Mindstorm kits. The objective of this course is to introduce the student to basic programming as well as problem solving strategies. This course will involve students in the development, building and programming of a LEGO Mindstorm robot. Students will work to design, build, and program. Topics may include motor control, gear ratios, friction, sensors, program loops, decision making, and timing sequences. Student designed robots will be programmed to complete various assigned tasks (challenges).

Fashion Photography  
6th-8th  
Description Coming Soon!

Middle School Biology  
6th-8th  
Course Description: In this phenomenal course, your middle schooler will learn about prokaryotes vs. eukaryotes, the levels of organization, all about the human cell, mitosis vs. meiosis, food chains & food webs, punnet squares, the scientific method and more! Students will be actively engaged with games, hands on activities, and experiments. Enroll your learner today!

Statistics Sanity  
Grades-9th-11th  
Through Statistics Sanity students will lay a foundation of statistical knowledge through fun experiments involving real-world data. Whether it be exploring the probability principles in a hands-on casino or conducting surveys about favorite candy or video games, students will collect, analyze, and draw conclusions in various settings.

There will be projects students will create to help build skills in statistics. This is a great course to prepare students for high school or college Statistics. The use of technology (TI Graphing Calculator) and supplemental videos will be an integral part of the sessions.
Painting into Art
7th-12th

“Painting into Art” invites students to explore the diverse techniques, styles, and expressive possibilities of painting as a visual art form. From the basics of color theory to the mastery of various painting mediums, students will embark on a journey that combines technical skill with personal expression, fostering creativity and a deeper understanding of the visual language. Letting the students know that they can express their vision with anything that they decide to touch.

Check back to see what other classes we add for the Summer!
