

July 8th - 12th
10:00 am - 12:00 pm

Food Photography

6th-10th

How do photographers take such life-like photos of food? In this class, students will learn about the photography tips and tricks that are used in commercial food advertisements. During this class, students will learn how to make and set up a small studio to arrange food to capture the perfect pictures. We will also see how photographers have to fake the aesthetics of a commercial, and race with time in order to capture the freshness of an item. And when time is against us, like when photographing ice cream, how do we adapt?

The Creativity Connection: Integrating Creativity into Core Curriculum

3rd-5th

Do you have your best ideas when you let your mind wander? Would you like to work on strengthening your creativity? The Creativity Connection is an online course designed to get students thinking outside the box. We will ponder “What if” questions, brainstorm creative writing starters, create and solve puzzles, and use online tools to share and showcase creative thinking. Together, we will delve into concepts students have learned in new and exciting ways. Students can expand and apply their creative thinking through tasks and projects using online platforms throughout this course. Join us as we put our creativity to the test!

LifeLab: Cells, Synapses, & Systems

6th-8th graders

Students will have hands on Demonstrations of how cells work together to make up the different systems of the human body. We will explore 4 of the systems in the human body, how the individual cell works, and how it works as a team to make up each system. Students will make their own cell models, one system model, and explain how it works with other body systems.
