

# On-Campus Course Description

**September 28th**  
**9:30 am - 3:00 pm**

## STEM into Science

2nd-4th

Who is ready to have hands-on experience with Science? The goal is to provide hands-on learning to help students engage in science. Students who do hands-on activities tend to remember more of what they were taught. During this course, students will build rockets, build 3-D diagrams of solar systems, create weather tools, use household items, and use a variety of edible treats to show the physical changes of the Earth. Using what they learn, from each activity, students will be able to identify the steps of the scientific process.

## The Human Brain: An Introduction to Neurology

6th-8th

In this fascinating course your middle schooler will learn about: the history of brain research, basic anatomy of the brain, the blood-brain barrier, roles of the left and right hemispheres, the lobes of the brain, savant syndrome, neurons, other types of brain cells, how nerve impulses travel, neurotransmitters, learning and memory, and basic brain abnormalities. This highly informative course is sure to spark their curiosity about our most complex organ! Enroll your learner today!

### Tuition:

The Saturday tuition fee is \$179 for each on-campus course and \$159 for each virtual course (including a non-refundable \$25 registration fee). Date: September, 28th

### Time:

9:30-3:00

\*At 2:45 p.m., we invite you to join your students in their class to see what they learned all day!
